

Super Dragin™ 484

Super Dragin™ Pump 484 is designed to vacuum up fluid spills thus allowing you to Recycle or Collect & Capture valuable lubricating oils, being compressed air powered means there is no fear of being electrocuted when working in a wet environment, Dragin 484 is capable of filling a 205 Litre drum within 2 minutes & when speed counts in dealing with spills or environmental impact then Dragin 484 works every time.

Simple in design with no priming necessary, simply install the Dragin 484 pump onto a 3/4" drum plug threaded location, then install the hose kit connection onto the 2" drum plug location, connect your 100 psi compressed air line and your up and running, easy to use Dragin 484 will vacuum the last drop as it produces more vacuuming power and air flow than electric units, so it's 'Safe, Simple & Incredibly Efficient'.

There are no moving parts, so there is no maintenance required, no fluids move through the pump only air flow, the chrome float valve (designed by us back in 1988) is faultless & will shut off the vacuum at the required full fill level within the drum. New design criteria has been developed and is now patented in Australia & New Zealand, Australian manufacturing at its best, Just think about the fact that you can now comply with spill control laws, with a one time cost outlay, no more restocking wheelie bin Absorbent packs. Please note we have anti-static models too!
