

Gutter Master™ 1020

- ✓ ENTRY LEVEL GUTTER CLEANING SYSTEM
- ✓ RELIABLE SYSTEM
- ✓ WET AND DRY CAPABILITIES
- ✓ HOSE & TOOLS INCLUDED

AN ENTRY LEVEL GUTTER VACUUM CLEANER ALLOWS YOU TO CLEAN GUTTERS FROM THE SAFETY OF THE GROUND

The Gutter Master™ 1020 model is our gutter cleaning machine designed to suit residential gutter cleaning services for the tradesman who is looking to add a few gutter cleaning jobs to his routine. It is equipped with 3 bypass vacuum motors producing 300 cfm of airflow and a 2.5 inch inlet that reduces inlet blockages. Each motor has an individual off/on switch.

A stainless steel 100 Litre waste collection container is fitted onto a trolley with wheels and enables you to empty the waste container by simply tipping it over.

The washable cloth filter can easily be removed for cleaning. An internal float is also fitted to stop vacuum flow when water level reaches the set limit.

Add the optional carbon fiber pole kit and wireless real time camera system to reach 12 metre high gutters.
