HOSE & TOOLS
INCLUDED

AN ENTRY LEVEL VACUUM SYSTEM FOR COMMERCIAL APPLICATIONS

The Gutter Master™ 1020 model is an entry level vacuum system for the person who is looking to add a few extra cleaning jobs per week. It is equipped with 3 bypass vacuum motors producing 300 cfm of airflow and a 2.5 inch inlet that reduces inlet blockages. Each motor has an individual off/on switch.

A stainless steel 100 Litre waste collection container is fitted onto a trolley with wheels and enables you to empty the waste container by simply tipping it over.

The washable cloth filter can easily be removed for cleaning. An internal float is also fitted to stop vacuum flow when water level reaches the set limit.

Add the optional carbon fiber pole kit and wireless real time camera system to reach up to 12 metre high.
