

Insulation Master™ 9000

AUSTRALIAN MADE

INDUSTRIAL GRADE PERFORMANCE

3 YEARS WARRANTY ON ENGINE*

This is the fastest way to remove old cellulose insulation fibres from ceiling spaces. Using a large diameter 5 inch duct hose Insulation Master will rapidly and profitably remove shredded cellulose insulation in a fraction of the time compared with regular vacuum cleaning.

An Australian developed, Cellulose and Rockwool fibre insulation removal vacuum that solves the design limitations associated with through the impeller style insulation removal machines. Insulation Master is unique in its class.

Featuring straight-through suction Insulation Master does not pass any of the vacuumed Cellulose insulation through its impeller fan scroll housing. This major operational improvement completely eliminates the rapid fan wear and engine drive shaft wear.

As a rapid recovery machine it is perfect for fast and profitable ceiling insulation removal with the benefit of having a significantly longer working lifespan with minimal ongoing maintenance costs. Insulation Master comes complete including 30 metres of anti-static Polyurethane vacuum duct hose. Available as either a skid mount or integrated into a custom road registrable trailer.

Litter Collection made *easy*

STANDARD & OPTIONAL FEATURES

- Extremely high airflow
- Unique, high static pressure, 12 blade turbo impeller fan
- Electric start Unleaded engine
- Optional Hose boom 3.5m long with 30m of Anti-Static, 5 inch Polyurethane hose
- Straight through suction means no impeller to snag
- Zero abrasion fan wear unlike typical leaf/litter vacuums
- Low cost, quick change, 400L capacity collection bags
- Ergonomic & light weight vacuum wand
- Bags feature inbuilt drawstring closure
- Intrinsically safe, fully enclosed rotating impeller fan
- Simple to use OH&S safe design
- Fully supported with 12 Month Warranty
- 36 Month engine warranty
- Stainless steel construction
- Integrated forklift skid
- Robust construction
- Australian Made

TYPICAL APPLICATIONS

Cellulose and rock wool fiber based insulation vacuuming
