

Wheelie Bin Vacuum 120-75-E

The Wheelie Bin Vac 120-75-E is a battery electric compact pedestrian litter collector with a 75mm or 125mm diameter vacuum unit powered by a 50-volt Lithium Ion Battery. It is quiet and environmentally friendly and can be used for both internal and external cleaning.

It is ideal for cleaning confined and awkward areas which cannot be accessed with mechanical sweepers. The litter does not pass through the impeller allowing broken glass to be collected. This machine is excellent for collecting small material such as smoking related and confectionery litter.

Run times are 40 minutes depending on usage and batteries are easily interchangeable, with a 75mm or 125mm suction hose, and weighing only 14kgs when empty. Supplied c/w 2 x 50-volt lithium ion battery and charger. Additional batteries are available.

An optional bin liner is available to allow the use of plastic bin bags. It is a general purpose machine with a wide variety of applications and is popular with local authorities as well as parks, hospitals and even such establishments as wedding venues and hotels.
